

Activator PLUS®

TREAT MANURE STORAGE SYSTEMS *Naturally*

Available in a 25 lb. Bag or 25 lb. Pail | SKU: 31000 Bag or 31100 Pail

ATTRIBUTES:

- Trillions of resilient microbes that improve performance of manure storage systems
- Great for liquifying solids and crust
- All natural, **ready-to-use product**

Activator Plus Comes in a **dry powder** and once mixed with water it will activate. It can also be dispersed as a dry powder on top of the slats and then washed in with water. *It has some resilience to disinfectants but better results occur if used a day or two after disinfectants.*

For pits with solids:

Apply **75%** of the product to areas with accumulated solids then spread the **remaining 25%** evenly over the rest of the pit.

Best when the pit has been drained or pumped, as it is easier to see solids.

The bacteria in **Activator Plus** will continue working in the pit beyond 30 days after treatment, but without the time release technology in the AgraSlats and AgraSpheres, repeated applications are necessary to maintain high activity. Repeated monthly treatment in problem pits is to ensure continuous high populations to rapidly digest solids in the pit.

DOSAGE

Crusted Manure & Pull Plug/Flush Systems:

1 lb. Activator Plus Mix
per 500 sq ft
of Crusting Surface

Ex: 50' x 200' = 10,000 sq ft. - 10,000 sq ft/350 sq ft = 28.5 lbs of ACTIVATOR PLUS per treatment (1+ pails)

Repeat treatments every 2-4 weeks until problem is resolved
