

AgraSlat®

TREATS DEEP PITS *Naturally*

Available in a case of 12 Slats | Treats 1200 Head

Formulated to liquefy slurry using time-release technology delivered at the bottom. Customer satisfaction guarantee on solids, crusting and foaming.

ATTRIBUTES:

- Liquefies sludge, slurry and crust
- Patented, time-release technology
- Two applications per year
- Reduces flies and odors
- No mixing required, **simply slide through slats**
- Deliver bacteria at the bottom, where solids occur
- Corn-based resin dispenser biodegrades in manure
- Use when there is no access point for the AgraSphere

Directions

SWINE NURSERY, GROWER, FINISHER

Deep pits containing less than 12 inches of retained bottom sludge

- **Add 1 AgraSlat** for every 100 head for Grower/ Finisher; 200 head for Nursery
Example: 1,200 head requires 12 Slats
- **Repeat** every 180 days

For deep pits with significant solids, repeat application every 3-4 months instead of 6 months

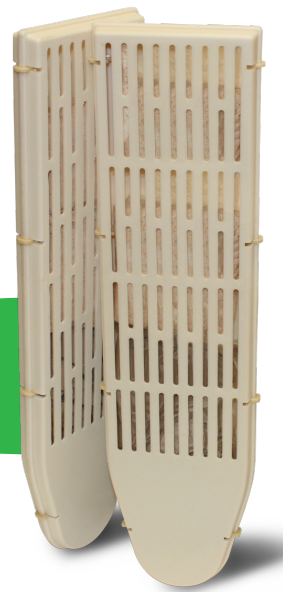

Place Slats evenly throughout the system

SWINE FARROWING, GESTATION, BREEDING

- **Add 1 AgraSlat** for every 40 head
Example: 480 head requires 12 Slats
- Repeat every 180 days

CRUSTED SYSTEMS

- **Do NOT** add when firm, heavy crust has accumulated
- Treat with **ACTIVATOR PLUS** prior to placement
- **Add Slats** once crust has been liquefied

Designed to fit between slats in filter barns
