

AgraSphere[®]

TREATS DEEP PITS *Naturally*

Available in a case of 6 Spheres = 1200 Head

ATTRIBUTES:

- Liquefies sludge, slurry and crust
- Patented, time-release technology
- Two applications per year
- Reduces flies and odors
- No mixing required, **simply toss sphere in pit**
- Deliver bacteria at the bottom, where solids occur
- Corn-based resin dispenser biodegrades in manure

Directions

SWINE NURSERY, GROWER, FINISHER
Deep pits containing less than 12 inches of retained bottom sludge

- **Add 1 AgraSphere** for every 200 head for Grower/Finisher; 400 head for Nursery
Example: 1,200 head requires 6 Spheres
- **Repeat** every 180 days

For deep pits with significant solids, repeat application every 3-4 months instead of 6 months
Place Spheres evenly throughout the system

SWINE FARROWING, GESTATION, BREEDING

- **Add 1 AgraSphere** for every 80 head
Example: 480 head requires 6 Spheres
- Repeat every 180 days

CRUSTED SYSTEMS

- **Do NOT** add when firm, heavy crust has accumulated
- Treat with **ACTIVATOR PLUS** prior to placement
- **Add Spheres** once crust has been liquefied

new

after 30 days

after 60 days
