

# BIOCIDE

**BIOCIDE IS A NATURAL INSECTICIDE FOR AGRICULTURE,  
FARM AND HOME CONTROL OF MOSQUITOS, BLACK  
FLIES AND WASTE NUISANCE FLIES.**

**Safe, effective & easy to apply**

## Directions

Before applying, calculate the square footage of the area to be treated in square feet;  
 $\text{Length} \times \text{Width} = \text{Total Square Feet}$

### LIVESTOCK

#### TREATMENT:

Apply evenly over the surface area at a rate of 1 lb. of **BioCide** for each 110 sq. ft. of surface area. A 1,000 to 1,200 head grower finisher barn will require 80 lbs. (2 x 40-lb. bags) of **BioCide** per treatment. **Repeat** treatment dose in 7-10 days.

#### CONTROL (after initial treatment):

**Repeat** every 14 days as needed for control after initial two treatments.

### FARM AND HOME

Apply evenly over areas where mosquito habitat and organic matter is found. The treatment dosage is required where high larval concentrations may be found, such as polluted standing water and high algae concentration areas. Control applications should be followed after the treatment dosage.

#### TREATMENT:

Apply evenly at a rate of 10 to 20 pounds of BioCide/acre (43,560 sq. ft.)

#### CONTROL (after initial treatment):

Apply evenly at a rate of 2.5 to 10 pounds of BioCide/acre (43,560 sq. ft.)

**Usage:** Read all BioCide bag and label instructions before using. Results are based on dosage levels. Best results are seen when the maximum treatment dose is used with first application of product.

**Caution:** DO NOT apply to drinking water containment areas or water receptacles intended for human use. For additional product information, please contact us.

Net Wt: 40 lb. bag | SKU: 34000
