

Odor-Dok Plus

REDUCE ODORS NATURALLY
SAFE, ALL-NATURAL PRODUCT

Attributes:

- Proprietary mixture that reduces gas emissions strongly related to odor and other hazards
- Works for cattle & swine slurry
- Iowa State University Extension study on this mixture showed a reduction of Hydrogen Sulfide emissions during pumping by 97%
- Binds ammonium ions, reducing ammonia volatilization in the barn and during field application
- Includes enzymes that digest organic solids
- Contains prebiotic components and reduces contaminants, increasing microbial digestion
- Reduced foaming during agitation has been observed

Application Directions:

Square Feet (Pitted Barns Only) - Apply 1 gallon per 2,000 - 2,500 square feet

Gallon (Lagoons Only) - Apply 1 gallon per 100,000 - 250,000 gallons

Head Space (Pitted Barns or Lagoons) - Apply 1 gallon per the following:

600 Nursery Pigs	100 Finishing Calves
300 Finisher Pigs	75 Finishing Yearlings Cattle
150 Sows	50 Dairy Cows

Apply product to several different areas of slurry to aid in spreading. If crusting, it is crucial for product performance that Odor-Dok Plus make it into the slurry and to use Activator Plus or Lagoon Activator to reduce the crust.

Reapply Odor-Dok Plus as needed. Odor-Dok Plus has been observed to remain effective anywhere from 3 to 8 weeks, variability is due to manure characteristics.
