HEALTHY FARMS

LAGOON AGRASPHERE

Formulated to activate, treat and maintain lagoon performance

Lagoon AgraSpheres are the natural, safe and effective way to treat lagoons.

- Patented, time-release technology
- Two applications per year
- Reduces flies and odors
- No mixing required, simply toss sphere in lagoon
- Delivers bacteria at the bottom, where problems occur
- High enzyme-producing bacteria, breaks down solids
- Corn-based resin dispenser biodegrades in lagoon

4 SPHERES

Contents: 4 Lagoon AgraSpheres - Each sphere treats 125,000 gallons of lagoon volume

MANUFACTURED IN MINNESOTA

Directions

Calculate storage volume: Length x Width x Depth x 7.5 = Total Gallons

Remove the sphere from the box, take out of outer plastic bag, leave the sphere assembled. Toss entire sphere in the lagoon as directed below. Sphere is made from corn-resin and biodegrades in lagoon.

Lagoon Treatment

- **Add 1 Lagoon AgraSphere** for each 125,000 gallons of lagoon volume
  Example: 500,000 gallons = 4 Lagoon AgraSpheres
- **Repeat** every 180 days or as needed

Application

Place 2/3 of the total spheres needed in the sections of the lagoon where the maximum amount of solids have accumulated.

Equally space the remaining 1/3 of spheres evenly throughout the lagoon.

For inoperative and overloaded lagoons, additional treatments may be required to activate the waste system and to reduce sludge. Combining the Lagoon AgraSphere with Lagoon Activator is advised for non-functional lagoons and those with large accumulations of sludge. For additional information on inoperative lagoons, contact your AgraSphere distributor or www.bioverse.com for assistance.
